

It's time to re-think your threat intelligence

Real-time threat data at your fingertips

With a growing emphasis on protecting a company's critical data and information assets, knowledge of cyber threats and malicious campaigns has never been more important. SolarNet's expertise in this sector make them the ideal integration specialist and managed service provider of Cybersixgill's world-leading threat intelligence solutions.

SolarNet

SolarNet are a predominantly services-focussed company with a global partner network of technologies enabling businesses to identify threats, be prepared, understand their security position and stop them from becoming a reality.

SolarNet are integration specialists, resellers and managed service providers of Cybersixgill, who have created a truly unique threat intelligence solution with complete coverage from the cyber-criminal underground.

Cybersixgill captures, processes and alerts teams to emerging threats, TTPs, IOCs and their exposure to risk as it surfaces on the clear, deep and dark web. SolarNet enable full integration of the solution into your organisation's environments so that key data can be processed, correlated and enriched with their threat data combined with machine learning techniques. This creates profiles and patterns of threat actors and their peer networks so you can capture and block threats as they emerge.

SolarNet's knowledge and expertise covers a variety of industries across both private and public sectors. They also offer a range of products and services specifically tailored for the Education sector.

ISO Certified

SolarNet are certified ISO 27001 - Information Security Management and ISO 9001 - Quality Management compliant, which epitomise our ability to consistently meet our customer's expectations and regulatory requirements.

Cybersixgill

Cybersixgill captures, processes and alerts teams to emerging threats, TTPs, IOCs and their exposure to risk as it surfaces on the clear, deep and dark web.

Cyber threat intelligence from sources you never knew existed

Cybersixgill covertly extracts data in real-time from a wide range of sources, including limited-access deep and dark web forums and markets, invite-only messaging groups, code repositories, paste sites and clear web platforms.

Our data collection and processing is fully automated for speed and accuracy, instantly creating and updating threat actor profiles, patterns and insights.

Pre-empt an attack

We process, correlate and enrich our threat data with machine learning techniques to create profiles and patterns of threat actors and their peer networks so you can capture and block threats as they emerge.

Expose Threats

Uncover threat activity in any language, format or platform from the clear, deep and dark web including X and Telegram.

Flexible Delivery

Our threat intelligence is accessible via a single/multi-tenancy SaaS Portal or API. It can also be seamlessly integrated into existing technologies or workflows.

AI supporting workflows

Cybersixgill IQ, our generative AI capability simplifies complex threat data for faster analysis, provides 24/7 assistance and instantly generates high-quality finished reports.
