

Cyber security solutions to keep you one step ahead

Focus your security on your most likely threats

With a growing emphasis on protecting a company's critical data and information assets, knowledge of cyber threats and malicious campaigns has never been more important. SolarNet's expertise in this sector make them the ideal integration specialist and managed service provider of Orpheus' world-leading threat intelligence solutions.

SolarNet

SolarNet are a predominantly services-focussed company with a global partner network of technologies enabling businesses to identify threats, be prepared, understand their security position and stop them from becoming a reality.

SolarNet are integration specialists, resellers and managed service providers of Orpheus, who have created a truly unique threat intelligence solution with complete coverage from the cyber-criminal underground.

Orpheus captures, processes and alerts teams to emerging threats, TTPs, IOCs and their exposure to risk as it surfaces on the clear, deep and dark web. SolarNet enable full integration of the solution into your organisation's environments so that key data can be processed, correlated and enriched with their threat data combined with machine learning techniques. This creates profiles and patterns of threat actors and their peer networks so you can capture and block threats as they emerge.

SolarNet's knowledge and expertise covers a variety of industries across both private and public sectors. They also offer a range of products and services specifically tailored for the Education sector.

ISO Certified

SolarNet are certified ISO 27001 - Information Security Management and ISO 9001 - Quality Management compliant, which epitomise our ability to consistently meet our customer's expectations and regulatory requirements.

Orpheus

Let us tell you who is likely to attack you, how they are going to do it and your live vulnerabilities that they will exploit. Doing so will enable laser-focused spending on the immediate security measures you need to stop your cyber risks before they happen.

Our threat intelligence solutions combine cutting-edge technology based on machine learning to minimise your exposure to breaches and that of your third-party supply chain.

Orpheus is well equipped to help you with a broad range of requirements, and we are proud to be accredited as one of only a handful of companies trusted to conduct critical national infrastructure cyber resilience testing.

Intelligence-led security testing is now established as the best way of protecting an organisation from advanced cyber threats. The Orpheus team are recognised as experts in providing the intelligence that enables red teams to deliver accurate testing plans. We have worked with both regulators and regulated companies to develop intelligence-led pentesting frameworks in a range of critical national infrastructure sectors, and are therefore extremely well placed to advise you on your testing – and manage your project to a successful outcome.

Orpheus uses its sophisticated technologies and expert team to support your specific intelligence requirements. Our ability to collect, process and analyse large volumes of data and information from an array of different sources – be it dark web, deep web, technical data, social media or other sources – and turn it into intelligence means we can provide expert support to meet your needs.
