

# Cyber Security Automation

The partnership that provides maximum automation, minimum investment and immediate ROI

With a growing emphasis on protecting a company's critical data and information assets, overcoming alert fatigue and being able to identify real threats rapidly has never been more important. SolarNet's expertise in this sector make them the ideal integration specialist and consultancy service providers of Securaa's comprehensive, no code security automation platform.

## SolarNet

We are one of the few specialist companies that truly understand SOAR and its application within all business models.

In partnership with Securaa, SolarNet can help you unlock the potential in your SOAR platform and get it providing you with an array of key benefits. We've been working with SOAR platforms for a while now and know how tricky it can be to get to grips with.

Over the years we have developed numerous integrations, workflows, playbooks and reports to help companies get the most from their platform, here's a sample of some key areas we can assist you with:

- Business Process Translation/Transformation into SOAR Frameworks
- Platform Deployment
- Platform Technology Advice
- Platform Integrations; Inception & Development; (covering 200+ systems but not limited to):  
*Anomali ThreatStream, Bespoke Tools / Custom Integrations, Bricata, FireEye HX, Microsoft Graph, Qualys, QRadar / QROC, ServiceNow*
- Workbook / Playbook Inception & Development

We have a unique ability to solve problems, it's in our DNA, and combined with our extensive knowledge of the Securaa SOAR platform we can help advise, implement and manage your SOAR journey. Whether you are new to SOAR or an existing SOAR user, SolarNet are here to help you. Let our expertise and guidance navigate you on our journey with SOAR.

SolarNet are certified ISO 27001 - Information Security Management and ISO 9001 - Quality Management compliant, which epitomise our ability to consistently meet our customer's expectations and regulatory requirements.

## Securaa

It's important to identify and respond to cyber threats as quickly as possible and most businesses today face challenges in effectively managing security applications, resources, operations, tasks, etc. across different providers and environments.

Focusing on a more versatile, data-driven approach, Securaa deliver a unified solution for SOC teams to manage their day-to-day threat monitoring and incident response.

Leveraging the power of machine learning (ML), artificial intelligence (AI), and hyperautomation, our platform orchestrates, automates, and responds to security alerts using visual playbooks and case management modules.

Our platform implements hyperautomation to streamline and optimise responses, driving consistent and timely actions, reducing analyst resolution time, and eliminating activity duplication. With the help of our AI-powered SOAR platform, we can detect and respond to a potential cyber attack on your organisation in minutes.

### Key Features:

- Provides superior and near term ROI for cybersecurity investments
- Faster Threat Detection and Response
- Start introducing automation for cyber and non-cyber infrastructure in days not weeks/months
- Increased Operational Efficiency
- Reduction in False Positives
- Improved Asset Visibility and Inventory Accuracy
- Reduction in Mean Time to Respond (MTTR)
- Enhanced Compliance and Reporting Accuracy
- Automate mundane tasks
